

Royal Grass®

...enjoy the easy life

Mowing the lawn? Trimming the edges? Let's be frank, there are more enjoyable things to do in your free time. With Royal Grass®, you will have more time to enjoy those things. With no effort, your grass will always look perfectly mown and tended. Even better: Royal Grass® doesn't need a drop of water, no matter how hot or dry it is. Which means you can enjoy a beautiful lawn with minimum maintenance.

The advantages

- *A beautiful green lawn all year round - without water and with minimum maintenance.*
- *A lawn that can withstand intensive use without developing bald patches or brown spots.*
- *Go ahead and sell your lawn mower! You will no longer need it, nor will you have to deal with the annual costs of spraying, reseeding and weed control.*
- *The best part is, you can install artificial turf where normal grass will not grow, whether in the shade, under a roof or even on a balcony or roof terrace.*
- *Royal Grass® feels wonderfully soft to the touch and has a guaranteed long life span, as well as an 8-year warranty on UV-stability and colour fastness.*

The Grass

...that doesn't drink

...that doesn't grow

...that can take a knock

...that doesn't burn

...that gives peace of mind

Royal Grass®; artificial grass for today's lifestyle!

Royal Grass®

...the unique grass profile

Since its establishment in 2003, Royal Grass® has become a leading brand in innovative artificial grass, with products available in 40 countries worldwide. Thousands of garden owners already enjoy the luxury of Royal Grass®.

The natural V-shape

When handling artificial grass, look up close! The fiber blade used for Royal Grass® mimics nature. As with natural grass, the fiber has a V-shaped structure. A robust core, the 'backbone' of the fiber, makes sure the blades stay as upright as possible. The result is incredibly realistic-looking grass.

This shape is a patented property of Royal Grass® and all products in our range feature this unique fiber. The V-shape combines decorative value with a natural appearance.

Just like the real thing!

Royal Grass® is produced with the utmost care. The color, height and density of the grass are perfectly matched. The end result would make Mother Nature jealous.

V-shape fibers with MiNT[®]-technology

As we are continuously striving to improve our grass and research possibilities for better performance and a more natural look, we looked even closer to natural grass than anybody ever did before. Here we noticed the microscopic nerves on natural grass blades. The micro nerve technology (MiNT[®]) results in a fiber which not only has great resilience and less reflection, it also has the best natural looks and soft feel at the same time.

The V-shape mimics nature for a stunning natural appearance.

Thanks to the micro nerve technology the fiber has a matt, silky colour and has strongly reduced reflection, preventing the grass to have a 'unrealistic and plastic look'.

The backbone and the ideal angle of the V-shape result in grass blades that stay as upright as possible and keep it upright for a longer time compared to regular artificial grass fibers.

MiNT
TECHNOLOGY[®]

(micro nerve technology)

The art of making grass

As market leader in luxury gardens, we know why people choose for Royal Grass[®]. People want to have their lawns hassle-free, natural looking, durable and especially soft feeling! With our knowledge of raw materials, and the latest technologies, we are able to combine these requirements in state-of-the-art artificial grass.

Powered by TenCate

*Royal Grass[®] is produced in the Netherlands using artificial grass fibers made by Royal TenCate in accordance with meticulous and strictly supervised quality standards. Royal Grass[®] is proud to offer the only artificial grass product on the market for garden landscaping that carries the 'powered by TenCate' label. This is our guarantee to you of a **high-quality product with a superior origin.***

Warranty

*Royal Grass[®] guarantees a long-lasting, beautiful lawn. Thanks to our history and experience, we provide an **8-year UV stability and colour fastness warranty** and a **life expectancy of more than 15 years.***

Responsibility

Royal Grass® is produced entirely from environmentally-friendly materials, so you and your family can relax and feel safe!

Royal Grass® ***...safe artificial grass***

The fibers from TenCate used for the production of Royal Grass® have been investigated according to the stringent German standard DIN 18035-7 in a testing scheme in which all applied polymer compositions and colors were represented. This means that no lead, cadmium, chromium total, copper, mercury, zinc or tin above the strict minimum limits are measured for leaching out into the groundwater.

Furthermore, a qualitative health risk analysis was conducted in 2005 by Dutch organisation TNO (organisation for Applied Scientific Research) to establish the possible dangers related to the use of Royal Grass®. The following exposure situations were covered:

- Inhalation of substances released at high outdoor temperatures (max 50 degrees C°).*
- Inhalation of substances released in a fire.*
- Eye contact with fibers.*
- Drinking water containing leached materials from Royal Grass® fibers and backing.*
- Contact between damaged skin and fibers.*
- Swallowing / sucking on Royal Grass® fibers.*

The conclusions based on the qualitative risk assessment of Royal Grass® products confirm that they are safe for use in all recommended applications.

Royal Grass®

- *Royal Grass® has a very natural appearance.*
- *Royal Grass® can be used everywhere and is low-maintenance. .*
- *Royal Grass® is proven environmental safe.*
- *Royal Grass® comes with an UV stability and colour fastness warranty.*

Royal Grass®

...installation in your garden

Royal Grass® can, in principle, be laid anywhere. There are a few conditions, however, that must be met to ensure the best possible result. Adequate base preparation is important for supporting the weight of the artificial grass and to help it last as long as possible.

Laying

Laying artificial grass requires professional skill, just as with paving and brickwork. Points that must be taken into consideration include the type of surface, weather conditions and the effect of weather on the grass. As with carpet laying, cutting the material to fit and seaming the joins require skill and experience. Naturally, the difficulty of the installation depends on the type of artificial grass chosen and the garden layout. For these reasons it is often best to leave the installation to the professionals.

Enjoy a beautiful lawn

Soaking up the sun in the grass, kicking off your shoes... What could be better than stretching out on a soft lawn? Can't you just picture it?

Maintenance

Royal Grass® will give you years of enjoyment with minimum maintenance. Here are some simple maintenance tips to keep the grass looking its best.

Tips

- Keep the grass free of debris and leaves.*
- Remove leaves using a leaf blower or rake.*
- Remove any weeds immediately to prevent seed dispersal.*
- Use clean water to rinse off any spills, such as from liquids like soda or melted ice cream.*
- Brush the grass regularly using a hard broom.*
- Pet excrement or smells can be removed using a shovel or detergent and water.*
- Avoid contact with hot materials (or close proximity to glass structures) to prevent shrinkage of the grass fibres.*

More information and frequently asked questions on maintenance can be found on our website.

The grass to be admired

You can be proud of your choice of Royal Grass®. Never again will the neighbours' grass be greener.

Royal Grass®
